

The House of Bavarian Agriculture Herrsching

A place of knowledge and exchange.
To move ahead. To do the right thing. Together.

The key to many solutions lies in education and communication. By communicating with one another we can overcome conflict, but it also allows us to share knowledge and experience.

This is precisely our intention at the House of Bavarian Agriculture Herrsching: We want to create a space where people come together, talk to each other, exchange ideas and consequently initiate change. www.hdbL-herrsching.de

Herrsching Elementary Course – Young, committed people, making a difference

Since 1948, every year for a period of 10 weeks, young people from the agricultural world have gathered to attend the Herrsching Elementary Course. They meet interesting people face-to-face, are schooled in management and public speaking skills, and go on study trips to Berlin and Brussels, broadening their horizons and growing character. Many have commitments in the political and societal sphere. We have the privilege to accompany and support these young people during an important phase of their lives. Committed individuals, who are making a small difference to our world

Further education for farmers

The House of Bavarian Agriculture Herrsching offers communication and public speaking, entrepreneurial courses as well as specialised conferences on agricultural topics. In our "workshops for the future", researchers present cutting-edge research and developments in agriculture, and we open up perspectives and bring people together.

The House of Bavarian Agriculture Herrsching is also primarily the conference centre of the Bavarian Farmers' Association, where all members, volunteers and members of staff are welcome.

The International Seminar for Young Farmer Leadership in HdbL

Since 1962, about 100 people from all over the world have met every two years at the House of Bavarian Agriculture in Herrsching at the invitation of the Federal Ministry of Food and Agriculture to share their knowledge and experience and to launch projects that address the main issues agriculture and rural areas are facing: climate change, rural exodus, sustainable management, scarcity of land. Because the challenges in rural areas are similar across the globe.
